

1| Soil meter with high quality probes. Too high or too low carbon content in the soil hinders plant growth. Fertilisers also produce different ECs in the soil that are involved in the different stages of plant growth.

2| The TDS value indicates the presence of Total Soluble Solids in water. The lower the TDS value, the higher the solubility of heavy ions in water.

3| Includes

- 1 meter
- 1 accessory
- 1 instruction manual

EC/TDS/CF Soil Tester with Probe

Code	KGB014
Item type	Soil tester
Material	Plastic
Battery	4 x AG13 (1.5V button cell battery)
Application	Measurement of soil parameters
Function	Salinity measurement
Uses	Agriculture, gardening
Measuring range	
EC	0.00 - 4.00 mS/cm
CF	0.00 - 4.00 CF
TDS	10 - 4000 ppm
Resolution	
EC	0.01 mS/cm
CF	0.01 CF
TDS	10ppm
Accuracy	±2%FS
Working temperature	0°C-50°C
Automatic temperature compensation	0°C-50°C
Weight	Approx. 219g
Length of instrument (display part)	Approx. 17cm
Probe length	Approx. 16.5cm
